## Classroom Information

Welcome to the month of May. I cannot believe we are in our last month of school. It will be a busy month! This month we will dive into the wonders of the ocean! We will explore various sea creatures, fish, crabs, jellyfish and dolphins, and many more. We will learn about ocean habitats and the importance of keeping our oceans clean.

---

## Classroom Curriculum

Week 1 – We will continue to work on writing the letters of the alphabet. We will set off on our journey of the ocean. We will begin to talk about all the different sea creatures found in the ocean.

Week 2 – We will talk about the different ocean habitats, what plants and nature are found in the ocean and how sea animals survive. We will discuss ways to keep our oceans clean.

Week 3 – We will wrap our ocean unit with talking about what kinds of activities we can do at the ocean, such as boating, fishing, swimming and camping.

Thank you for a wonderful year! We appreciate you sharing your amazing children with us! Have a great summer!
