

## Reformed Unit 1 Exam

Name \_\_\_\_\_

**1. HISPANIC POPULATION PERCENTAGE  
BY COUNTIES IN THE UNITED STATES, 2010**

**Source: United States Census Bureau**

**Which of the following is a limitation of the map of Hispanic population percentage?**

- (A) The small size of urban counties in the eastern United States masks the significance of the Hispanic population in most eastern cities.
- (B) Larger county sizes in the western United States mask the significance of the Hispanic population in most western counties.
- (C) States with the largest total populations mask the significance of the Hispanic population in those states.
- (D) States with the smallest total populations mask the significance of the Hispanic population in those states.
- (E) The pattern shown is not different than the pattern of early Hispanic settlement during the era of colonization.

**2. Latitude and longitude may be used to determine which of the following characteristics of a place?**

**Reformed Unit 1 Exam**

---

- (A) Its site features
  - (B) Its absolute location
  - (C) Its relative location
  - (D) Its situation
  - (E) Its elevation
- 

3. Which of the following is most likely to be used by a marketing firm seeking to map patterns of lifestyle characteristics in the United States?

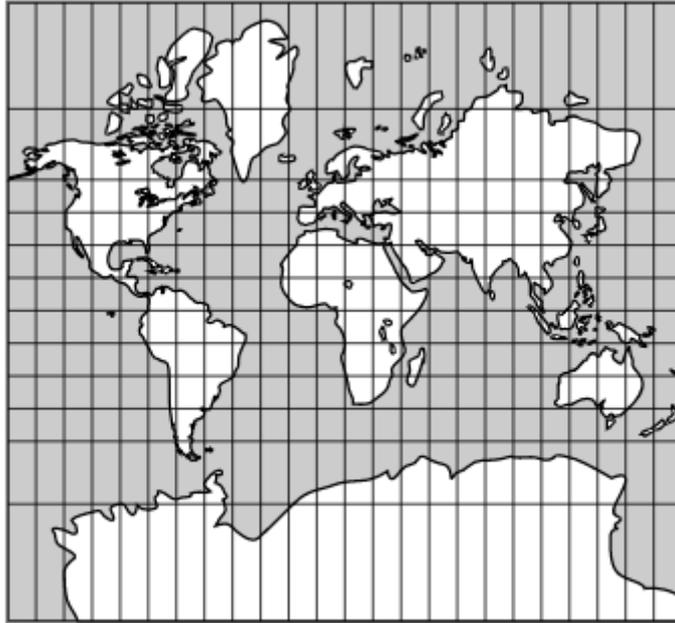

- (A) States
  - (B) Zip codes
  - (C) Nonmetropolitan areas
  - (D) Congressional districts
  - (E) Counties
- 

**Reformed Unit 1 Exam**

---

4.

The map above represents what kind of projection?

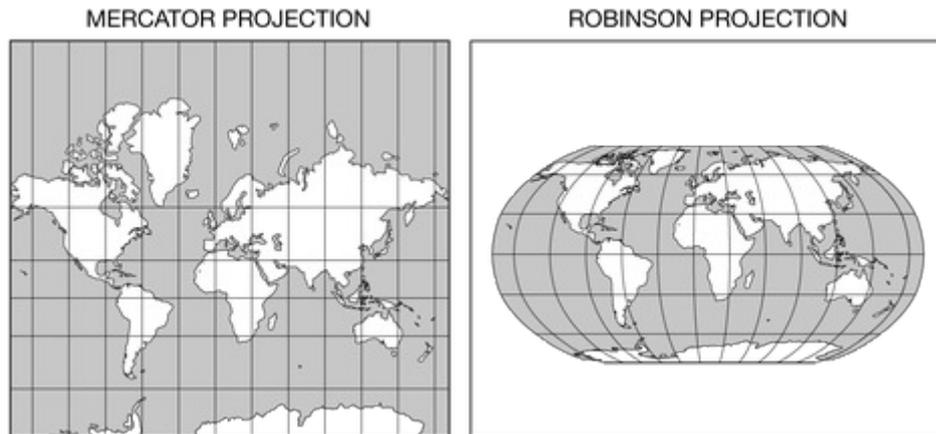

- (A) A Mercator projection with distorted land areas
  - (B) A planar projection with diverging lines at the poles
  - (C) A homolosine projection with continuity of landmasses
  - (D) A Robinson projection with distortions at the equator
  - (E) A gnomonic projection with distortions of bodies of water
- 

**Compare the two maps shown, then answer the following questions.**

**Reformed Unit 1 Exam**

---

5. Which of the following is a characteristic of the Mercator projection?
- (A) The size and shape of countries in the higher latitudes are greatly exaggerated.
  - (B) The size of all countries is accurate, but the shape is distorted.
  - (C) Countries near the Equator appear 50 percent larger than countries in the middle latitudes.
  - (D) The projection is designed to maintain undistorted outlines of landmasses.
  - (E) Distances on the Mercator projection are real and accurate.
- 
6. Which of the following statements about the Robinson projection is correct?

**Reformed Unit 1 Exam**

---

- (A) It is more useful for long-distance navigation than the Mercator projection.
- (B) It is better for making topographical maps than the Mercator projection.
- (C) It is more accurate than the Mercator projection in showing the sizes of countries in higher latitudes.
- (D) It is more useful for showing the distribution of human populations than the Mercator projection.
- (E) It is better for estimating territorial waters in lower latitudes than the Mercator projection.
- 

## Reformed Unit 1 Exam

## 7. CENSUS FORM, 2010

United States  
**Census 2010**

This is the official form for all the people at this address.  
It is quick and easy, and your answers are protected by law.

U.S. DEPARTMENT OF COMMERCE  
Economics and Statistics Administration  
U.S. Census Bureau

Use a blue or black pen.  
**Start here**

The Census must count every person living in the United States on April 1, 2010.  
Before you answer Question 1, count the people living in this house, apartment, or mobile home using our guidelines.

- Count all people, including babies, who live and sleep here most of the time.
- The Census Bureau also conducts counts in institutions and other places, so:
  - Do not count anyone living away either at college or in the Armed Forces.
  - Do not count anyone in a nursing home, jail, prison, detention facility, etc., on April 1, 2010.
  - Leave these people off your form, even if they will return to live here after they leave college, the nursing home, the military, jail, etc. Otherwise, they may be counted twice.

The Census must also include people without a permanent place to stay, so:

- If someone who has no permanent place to stay is staying here on April 1, 2010, count that person. Otherwise, he or she may be missed in the census.

**1. How many people were living or staying in this house, apartment, or mobile home on April 1, 2010?**  
Number of people =

**2. Were there any additional people staying here April 1, 2010 that you did not include in Question 1? Mark X if that apply.**

Children, such as newborn babies or foster children  
 Relatives, such as adult children, cousins, or in-laws  
 Nonrelatives, such as roommates or live-in baby sitters  
 People staying here temporarily  
 No additional people

**3. Is this house, apartment, or mobile home — Mark X if ONE box.**

Owned by you or someone in this household with a mortgage or loan? Include home equity loans.  
 Owned by you or someone in this household free and clear (without a mortgage or loan)?  
 Rented?  
 Occupied without payment of rent?

**4. What is your telephone number? We may call if we don't understand an answer.**  
Area Code + Number  
 -  -

OMB No. 0507-0199-C Approval Expires 12/31/2011.  
Form **D-6** (03-2010)

**5. Please provide information for each person living here. Start with a person living here who owns or rents this house, apartment, or mobile home. If the owner or renter lives somewhere else, start with any adult living here. This will be Person 1.**  
What is Person 1's name? Print name below.

Last Name

First Name  MI

**6. What is Person 1's sex? Mark X ONE box.**  
 Male  Female

**7. What is Person 1's age and what is Person 1's date of birth? Please report babies as age 0 when the child is less than 1 year old. Print numbers in boxes.**  
Age on April 1, 2010    
Month  Day  Year of birth

→ NOTE: Please answer BOTH Question 8 about Hispanic origin and Question 9 about race. For this census, Hispanic origins are not races.

**8. Is Person 1 of Hispanic, Latino, or Spanish origin?**

No, not of Hispanic, Latino, or Spanish origin  
 Yes, Mexican, Mexican Am., Chicano  
 Yes, Puerto Rican  
 Yes, another Hispanic, Latino, or Spanish origin — Print origin for example: Argentine, Cuban, Dominican, Honduran, Nicaraguan, Spanish, and so on.

**9. What is Person 1's race? Mark X one or more boxes.**

White  
 Black, African Am., or Negro  
 American Indian or Alaska Native — Print name of enrolled or principal group

Asian Indian  Japanese  Native Hawaiian  
 Chinese  Korean  Guamanian or Chamorro  
 Filipino  Vietnamese  Samoan  
 Other Asian — Print race for example: Hong, Laotian, Thai, Pakistani, Cambodian, and so on.

Other Pacific Islander — Print race for example: Fijian, Tongan, and so on.

Some other race — Print race

**10. Does Person 1 sometimes live or stay somewhere else?**  
 No  Yes — Mark X all that apply.

in college housing  for child custody  
 in the military  in jail or prison  
 as a seasonal or second residence  in a nursing home  
 for another reason

→ If more people were counted in Question 1, continue with Person 2.

U.S. CENSUS BUREAU

Source: United States Census Bureau

A political polling company wants to use census data to collect information on voters in a city by neighborhood. Based on the types of information collected in the survey form, which of the following could be mapped using census data?

- (A) The number of voting-age residents per household
- (B) The political party affiliation of the average resident
- (C) How residents voted in the last election
- (D) How voters might vote in the next national election
- (E) How voters stand on current issues

**Reformed Unit 1 Exam**

---

**8. IMPERIAL VALLEY  
ALONG THE UNITED STATES–MEXICO BORDER**

**Source: NASA**

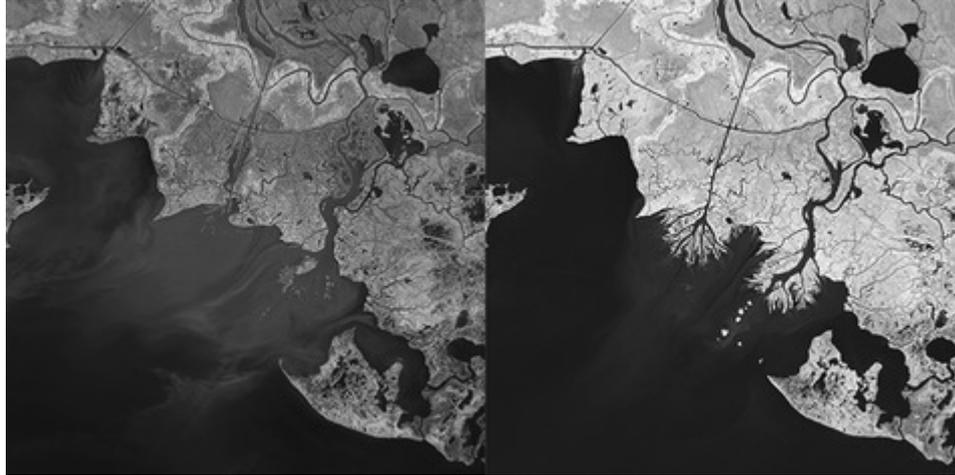

**Which of the following best describes the data presented in the image?**

- (A) Coordinates for a satellite navigation system
- (B) Political map of a region
- (C) Series of geographic information systems layers
- (D) Remote sensing satellite image of land use
- (E) Cartogram of quantitative spatial information

**Reformed Unit 1 Exam**

---

**9. MOUTHS OF THE ATCHAFALAYA RIVER ON THE LOUISIANA COAST OF THE GULF OF MEXICO, SATELLITE IMAGES IN 1984 (LEFT) AND IN 2017 (RIGHT)****RIVER DELTA FORMATION, 1984 TO 2017**

New Land Areas	Land Added
Wax Lake Delta	14,536 acres
Atchafalaya River Delta	18,533 acres
Total	33,069 acres

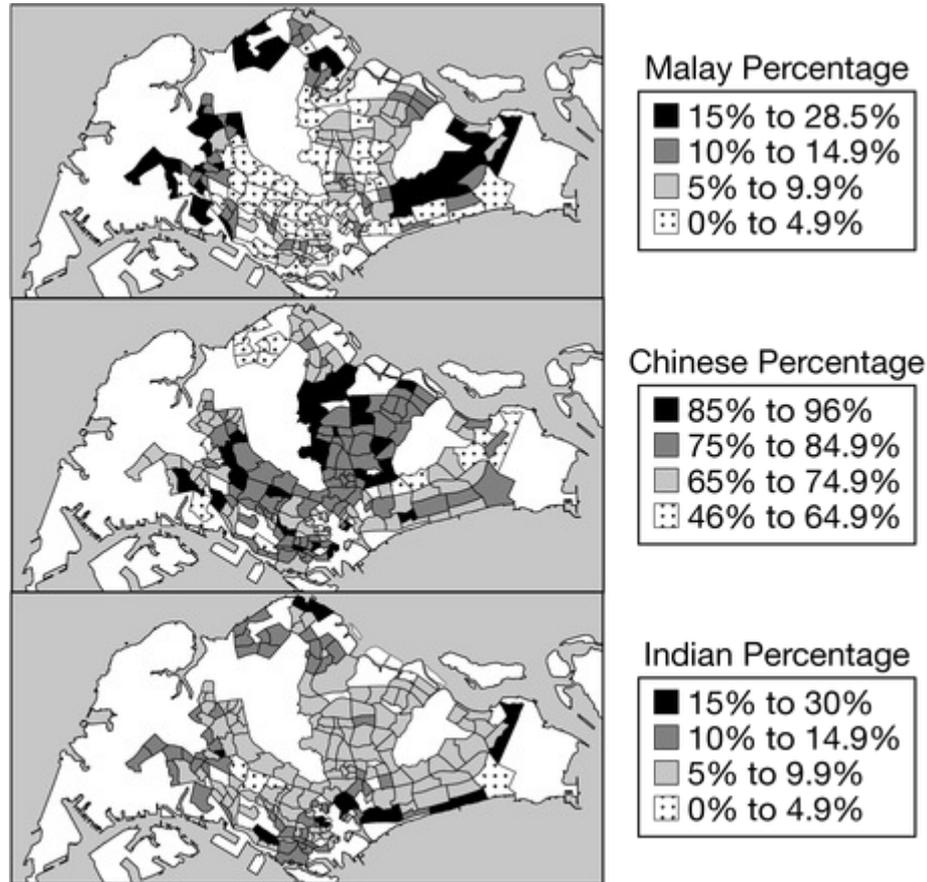

The satellite images show changes to a portion of the Louisiana coast between 1984 and 2017. The table shows the changes in land acreage. Which of the following best describes the changes and a consequence of the changes?

- (A) The expansion of coastal cities, which results in increased acreage of urban land cover
- (B) A decrease in the acreage of coastal land, which affects the prices of local property
- (C) An increase in the acreage of coastal land, which will be added to navigational charts for shipping
- (D) The rise of sea levels, which results in decreased land acreage available for homes and businesses
- (E) An increase in land acreage caused by the construction of polders for land reclamation
- 

## Reformed Unit 1 Exam

## 10. RESIDENTIAL NEIGHBORHOODS IN SINGAPORE

Source: Esri

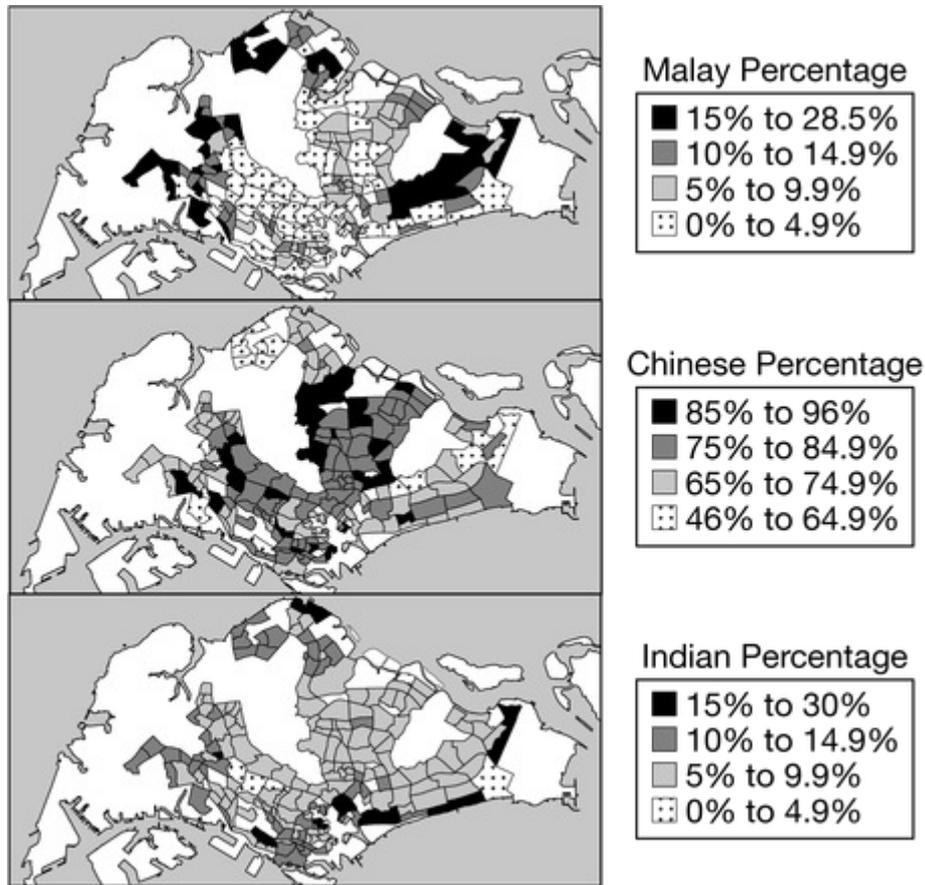

The maps show residential neighborhoods in the Republic of Singapore. Which of the following individuals or organizations would be most likely to make a decision based on the spatial pattern shown on the maps?

- (A) A person planning to move from a more rural area to a more urban area within Singapore
- (B) A business analyzing demographic change over time within its market area
- (C) An environmental advocacy group seeking to protect habitats of vulnerable species
- (D) A government agency seeking to promote equal opportunities across ethnicities
- (E) A multinational corporation identifying a location for a new factory

## Reformed Unit 1 Exam

## 11. RESIDENTIAL NEIGHBORHOODS IN SINGAPORE

Source: Esri

Which of the following best describes the spatial pattern of ethnicity in Singapore's neighborhoods?

- (A) Malay is the largest ethnic group, ethnic Chinese live in the center of the city, and ethnic Indians live in the peripheral neighborhoods.
- (B) The three major ethnic groups, Malay, Chinese, and Indian, are evenly distributed across the city.
- (C) Ethnic Chinese residents are in the majority across most of the city, while ethnic Malay and ethnic Indian residents are concentrated in the peripheral neighborhoods.
- (D) Ethnic Malay and ethnic Indians are evenly distributed throughout the city, while Chinese are only in the majority within the core central neighborhoods.
- (E) Indian is the largest ethnic group, ethnic Chinese live in the center of the city, and ethnic Malay live in the peripheral neighborhoods.

**Reformed Unit 1 Exam**

**12. WORKING-AGE POPULATIONS, 2000–2030**

Region	Working-Age Population in 2000 (millions)	Working-Age Population in 2015 (millions)	Projected Working-Age Population in 2030 (millions)	Percent Change 2000-2015	Projected Percent Change 2015-2030
World	3,860	4,825	5,496	25.0%	13.9%
Asia	2,370	2,988	3,306	26.1%	10.6%
Europe	452	446	405	-1.3%	-9.2%
Latin America	305	395	452	29.5%	14.4%
North America	197	217	220	10.2%	1.4%
Sub-Saharan Africa	338	519	803	53.6%	54.7%

Source: Population Reference Bureau

An international company is looking to expand its network of factories, which use labor-intensive production methods, in a region of the world experiencing significant growth in the working-age population. Based on the data in the table, which of the following regions should the company choose?

- (A) North America, which will have faster working-age growth in 2015 to 2030 than in 2000 to 2015
- (B) Asia, which will have a faster working-age growth rate in 2015 to 2030 than in 2000 to 2015
- (C) Latin America, which had the fastest working-age growth rate among world regions from 2000 to 2015
- (D) Asia, which will have the fastest working-age growth rate among world regions from 2015 to 2030
- (E) Sub-Saharan Africa, which will have the fastest working-age growth rate among world regions from 2015 to 2030

**13. A SHORT WALK THROUGH CENTRAL PARK IN NEW YORK CITY**

Walkway	Time
Walk down from the Alice in Wonderland statue to the model boat pond.	Less than 1 minute
Turn right and walk along the pond, until you come to the Hans Christian Anderson Monument.	1 minute
From there, walk west through the trees and cross the road at East Drive.	1 minute
Turn left at the lake and walk along the shore to the Bethesda Fountain.	2 minutes
Walk around the fountain and continue on the path along the lake.	1 minute
As the path turns to the left you will see the Bow Bridge on the right.	2 minutes

Which of the following best describes the type of information provided in the directions?

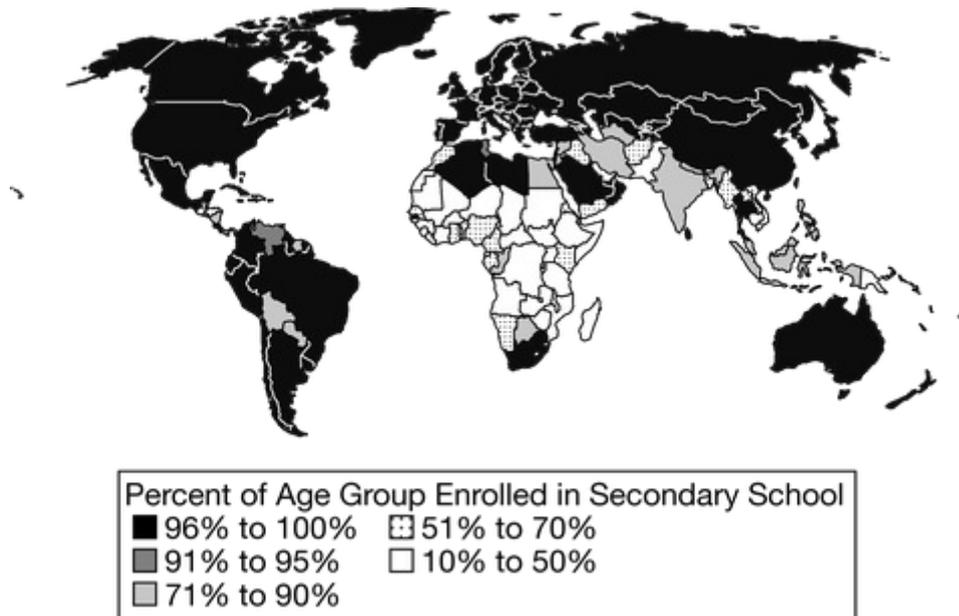

**Reformed Unit 1 Exam**

---

- (A) Absolute location
- (B) Relative location
- (C) Cultural landscape
- (D) Geographic information systems
- (E) Cartographic principles
- 

**14. SECONDARY SCHOOL ENROLLMENT PERCENT, 2016  
(PERCENT OF ELIGIBLE AGE GROUP ENROLLED)**

**Source: World Bank**

**Which of the following spatial patterns accurately describes the data presented in the map?**

**Reformed Unit 1 Exam**

---

- (A) Most continents have countries with secondary school enrollments below 75 percent.
  - (B) There are no countries in Africa with secondary school enrollments above 90 percent.
  - (C) The majority of countries with less than 70 percent secondary school enrollment are in sub-Saharan Africa.
  - (D) The secondary school enrollment is proportional to population density.
  - (E) Landlocked countries have secondary school enrollments above 90 percent.
- 

15. In descriptions of interaction between people and the environment, the term “environmental determinism” implies that

- (A) the physical environment exclusively shapes humans and their actions
  - (B) humans by their actions and technologies alter the physical environment to suit their needs
  - (C) determination of environmental limitations is a primary task of geographers
  - (D) capitalist economies do not contribute to global environmental degradation
  - (E) there exists no interacting relationship between people and their surrounding physical environment
- 

**Reformed Unit 1 Exam**

---

16.

**Window screens****Green roofs****Photovoltaics****Breezeways****Pilings**

All of the terms listed above could be used to illustrate what concept?

- (A) Folk cultures responding to physical geography
  - (B) Diffusion of cultural traits from Asia
  - (C) Architectural adaptations to the natural environment
  - (D) Elements of cultural identity
  - (E) Innovation without diffusion
- 

17. Which of the following global trends best exemplifies the concept of sustainability?

- (A) An increase in the use of agricultural pesticides, because farms using agricultural chemicals produce more food.
  - (B) An increase in the use of electric vehicles, because their reduced emissions result in less environmental pollution.
  - (C) A decrease in the amount of polar sea ice, because it opens more sea lanes for shipping.
  - (D) An increase in the number of people living in coastal areas, because residents will feel more connected to nature.
  - (E) A decrease in the practice of slash-and-burn agriculture, because large irrigated farms produce food more efficiently.
- 

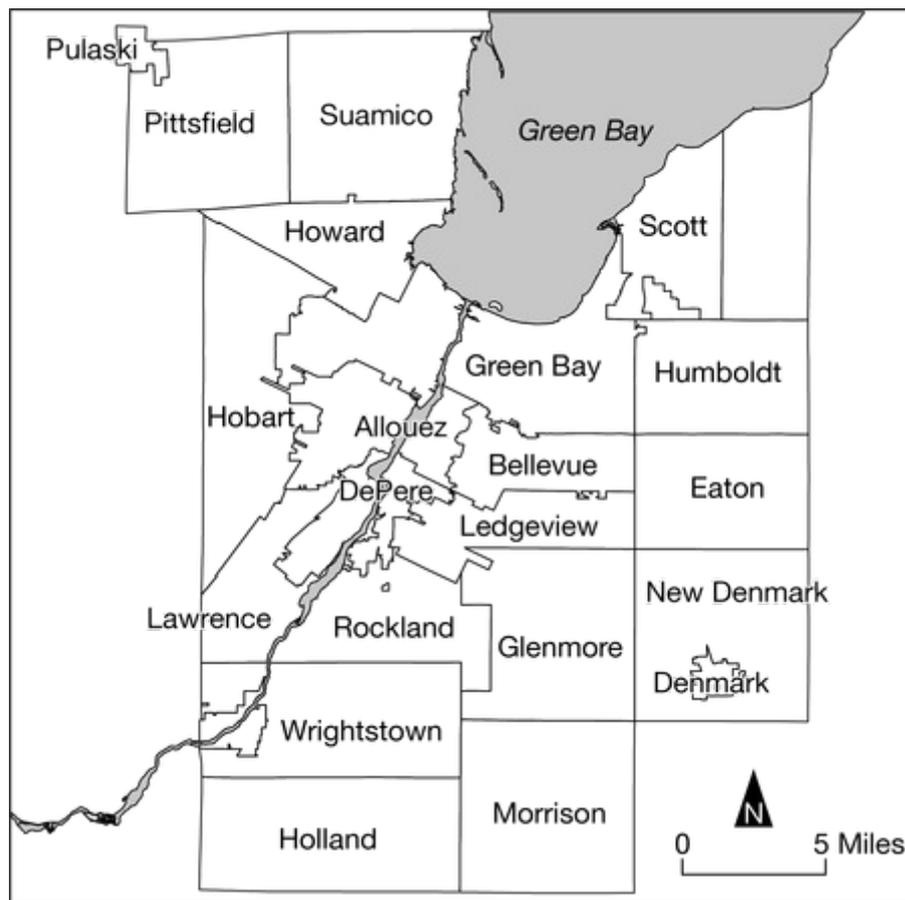

**Reformed Unit 1 Exam**

18. The concept of environmental sustainability is best explained by which of the following examples?

- (A) Strip-mining of coal on mountainsides, to keep miners from working in underground conditions
- (B) Terracing rice paddies on hillsides, to prevent soil erosion and provide gravity-fed irrigation
- (C) Clear-cutting trees in coastal woodlands, to provide building materials for constructing homes
- (D) Fattening cattle in dryland feedlots, to practice agriculture efficiently and at the lowest cost
- (E) Draining of wetlands in residential areas, to reduce the presence of stinging insects

19.

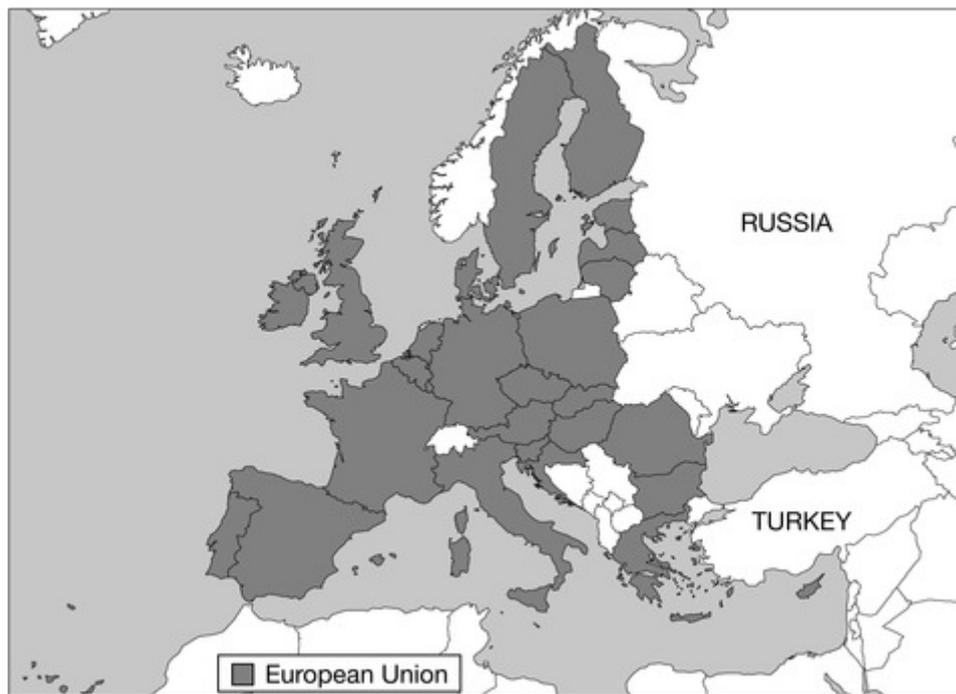

Which of the following scales is represented in the map shown?

**Reformed Unit 1 Exam**

---

- (A) Local, showing the towns and township areas in a county
- (B) Regional, showing the states or provinces in one part of a country
- (C) State or province, showing the counties or parishes
- (D) Neighborhood, showing the block along street boundaries
- (E) Block, showing the property lines and names of owners
- 

**EUROPEAN UNION 2018****COUNTRIES OF THE FORMER YUGOSLAVIA**

**Reformed Unit 1 Exam**

---

Source: Natural Earth GIS

20. Which of the following best identifies the scale of analysis for each of the maps shown?

- (A) Global and regional
- (B) Regional and urban
- (C) Continental and country
- (D) Global and local
- (E) Country and local

21. Why would a town planner use a map at the 1:24,000 scale rather than a map at the 1:250,000 scale?

## Reformed Unit 1 Exam

---

- (A) The map at the 1:24,000 scale shows a much larger area.
- (B) The map at the 1:24,000 scale is easily converted to non-metric measurements.
- (C) The map at the 1:24,000 scale shows the town close-up in more detail.
- (D) The map at the 1:250,000 scale shows the town in too much detail.
- (E) The map at the 1:250,000 scale shows too small of an area to see the whole town.
- 

**TABLE 1: MEDIAN HOUSEHOLD INCOME FOR SELECTED PLACES, 2018**

Place	Median Household Income
United States	\$57,652
New York State	\$62,765
New York City metropolitan area	\$75,368
City of New York	\$57,782

**TABLE 2: MEDIAN HOUSEHOLD INCOME, 2018**

**FIVE BOROUGHES OF NEW YORK CITY**

Place	Median Household Income
Bronx	\$36,593
Brooklyn	\$52,782
Manhattan	\$79,781
Queens	\$62,008
Staten Island	\$76,244

**Reformed Unit 1 Exam**

---

22. The data on median household income in Table 1 is presented in different

- (A) culture regions
  - (B) physical regions
  - (C) map scales
  - (D) scales of analysis
  - (E) vernacular regions
- 

23. Read the definitions below and then answer the question that follows.

**Watershed:** A region in which all rainfall eventually flows downhill through a system of streams and tributaries into the same body of water, such as the catchment basin of a river or lake.

**Milkshed:** A region in which fresh milk is produced and can be delivered without spoilage for sale and consumption. A dairy farm sits at the center of an area, the size of which is determined by how far fresh milk can be shipped and still maintain shelf-life for consumers.

Given the definitions, watersheds and milksheds can best be classified as what type of region?

**Reformed Unit 1 Exam**

---

- (A) Culture
  - (B) Formal
  - (C) Functional
  - (D) Industrial
  - (E) Vernacular
- 

24. Which of the following are the best examples of vernacular regions?

- (A) The Canadian Maritimes and the Northwest Territory
  - (B) The American West and the American Midwest
  - (C) South Africa and Australia
  - (D) South America and the Caribbean
  - (E) Scandinavia and the Iberian Peninsula
-
